

ARCHER'S GUIDE

44th
ANNUAL

Longbow Safari

The 2026 North American

Longbow Safari at Rancho

Neblina in Petaluma, CA honors the Golden Age of the Longbow and the legacy of pioneers like Howard Hill, when skill, wood, & steel were all an archer needed.

This 2 day event is a true Safari Style shoot w/ 60 targets, complete with a "Guide".

Every shot is designed with purpose, echoing the challenges faced by traditional bowhunters of the past. Only true longbows with traditional or reverse handles & wood arrows are allowed. String must not touch the limbs.

Wood shafts, feather fletching & 2 blade broadheads are required for the trail & running events, preserving the hunting heritage & seriousness of the Safari Tradition.

Flu Flu's w/field points for bow birds & field points for Archery Golf.

NO sights. NO elevated rests. NO massive risers, NO bolt on limbs or other modern shortcuts. Just archer & bow as it has always been.

More than a shoot, this is a gathering and fellowship of archers drawn together by tradition, craftsmanship, and the enduring spirit of the longbow.
